

Identification Data

February 13, 2009

Natural Diamond
Certificate Number:

18122000

Gemprint®:

This unique optical fingerprint is positive identification of your diamond. All Gemprinted diamonds are registered at www.DiamondID.com.

Laser Inscription:

Actual image of the inscription photographed at magnifications greater than 10x.

580 Fifth Avenue, Lower Lobby, New York, NY 10036

The 4Cs Grading Analysis

Carat Weight:

1.01

Measurements:
Shape and Cutting Style:

6.50 - 6.52 x 3.99mm
Round Brilliant Cut

Cut Grade:

Excellent (95)

Ideal 100	Very Good 90-80	Good 75-65	Fair 60-50	Poor 45-40
Excellent 95				

Light Performance:

(40)

Optical Brilliance:
Optical Symmetry:

Excellent
Excellent

Excellent 40	Very Good 35	Good 30	Fair 25	Poor 20
--------------	--------------	---------	---------	---------

Finish:

(25)

Polish:
External Symmetry:

Very Good
Excellent

Excellent 30	Very Good 25	Good 20	Fair 15	Poor 10
--------------	--------------	---------	---------	---------

Proportions:

(30)

Girdle Thickness:
Culet Size:

Medium
None

Excellent 30	Very Good 25	Good 20	Fair 15	Poor 10
--------------	--------------	---------	---------	---------

Color:

F

Fluorescence:
Treatments:

None
None

Clarity:

VS2

Grade Setting Inclusion:
Grade Setting Location:
Treatments:

Crystal
Bezel
None

Comments: Girdle laser inscribed "18122000" and GCAL logo

Photomicrographs:

Actual images of the crown (top) and pavilion (bottom) of this diamond photographed at magnifications up to 10x.

Light Performance Profile

Optical Brilliance Analysis:

Brilliance is the overall return of light to the viewer. The brilliance image is a representation of (a) white areas of light return, or brilliance, and (b) dark-blue areas of light loss.

Excellent

Optical Symmetry Analysis:

The colored areas of the symmetry image are indications of light handling ability, giving a visual representation of proportions and facet alignment.

Hearts

Arrows

Proportion Diagram:

The proportion diagram illustrates the actual dimensions as recorded by laser scanning technology.

The grading of diamonds is a subjective scientific procedure. Diamond grading reports are expressions and opinions that have been shown to have reasonable variances and tolerances even when performed by well-trained and unbiased professionals. The carat weight is measured electronically; the cutting proportions are analyzed electronically with laser scanning technology; the color is graded by use of master comparison diamonds in a controlled lighting environment; the clarity is determined by examination under dark field binocular magnification.
